

# 18 amp-hour CaddyCell Lithium Battery Instructions

All CaddyCell batteries are made of high quality Lithium Ferro-Phosphate cells. Safest, most stable battery available for your Kangaroo. One-year warranty.\*

Please follow these instructions to get the most out of your CaddyCell battery.

## Connecting battery:

Attach battery wiring harness to chassis power port on your Kangaroo Golfstream, lining up black to black on the plug.

## Removing Battery:

Detach battery wiring harness from chassis power port.

- Always ensure charger or motorcaddie connections are fully connected to the battery.
- Don't position plug in a way that will cause any strain on the plug or wire.
- Per airline safety regulations, do not transport battery by air. Can be transported in the trunk of a car, but do not store there for extended periods.
- Recharge immediately after every round, even when you've played fewer than 18 holes.

*\*CaddyCell lithium battery is rain safe but cannot be fully immersed in water. If it is fully immersed the warranty will be voided.*

## Charging

1. Connect charger cable to the wiring harness attached to the battery, lining up red to red and black to black on the plug.
2. Plug power cable into the charger. Plug into wall socket.
3. Red light on charger indicates battery is charging. Green light indicates battery is fully charged.

- Okay to leave battery on after recharging is complete, but don't leave charging indefinitely. Remains ready for 18 holes up to 12 weeks.
- When charger isn't in use, ensure it is unplugged from the wall outlet AND battery. This prevents damage in case of a power-surge.
