

CaddyCell Lithium Battery Instructions

All CaddyCell batteries are made of high quality Lithium Ferro-Phosphate cells. Safest, most stable, and longest lasting battery available for your Kangaroo. One-year warranty.*

Please follow these instructions to get the most out of your CaddyCell battery.

Charging

1. Attach charger cable to charger port located on side facing negative terminal.
2. Attach power cable to charger. Plug into wall socket.
3. Red light on charger indicates battery is charging. Green light indicates battery is fully charged.

Operation

Hooking up battery:

1. Attach battery wiring harness to chassis power port on your Kangaroo, lining red to red and black to black.
2. Attach "t-bar" to terminals on CaddyCell battery, lining positive to positive and negative to negative.

Removing Battery

Detach "t-bar" from battery terminals. Battery wiring harness can be left in place if you prefer.

USB Port

USB port is located on the side of battery facing positive terminal. Simply lift velcro cover to attach USB cable for charging your electronic device.

Safety

- Always ensure charger or motorcaddie connections are fully connected to the battery.
- Don't position charger plug in a way that will cause any strain on the plug or wire.
- When charger isn't in use, ensure it is unplugged from the wall outlet AND battery. This prevents damage in case of a power-surge.
- Per airline safety regulations, do not transport battery by air. Can be transported in the trunk of a car, but do not store there for extended periods.
- Recharge immediately after every round, even when you've played fewer than 18 holes.
- Ok to leave battery on after recharging is complete, but don't leave charging indefinitely. Remains ready for 18 holes up to 12 weeks.

**CaddyCell lithium battery is rain safe but cannot be fully immersed in water. If it is fully immersed the warranty will be voided.*
